About Me

Currently pursuing a BTech in Computer Science and Engineering at Parul University, Vadodara. I am deeply passionate about technology, with a keen interest in lens creation and ethical hacking. My background includes developing a personal website and continuous learning through projects that challenge my understanding and skills in cybersecurity and web development.

Education

Parul University, Vadodara

BTech, Computer Science and Engineering

2022–2025

Shree KJ Polytechnic, Bharuch

Diploma, Computer Science

2019–2022

Projects

Personal Website: A portfolio showcasing my projects and skills, highlighting my journey and achievements in front-end development and design.

 nehalchauhanportfolio.vercel.app

BMI Calculator: A web application built using React.js, Node.js, Express.js, and MongoDB for analyzing Body Mass Index (BMI) based on weight and height inputs. The application estimates body fat and provides BMI values along with interpretations, enhancing health awareness.

 github.com/mRcOol7/body-mass-index-cal

Private Contest Platform: A MERN stack website for private contest platforms like Dream 11 and My11Circle, allowing users to register their own contests and enabling other users to view and copy contest codes.
